Practical Activity: Directory Navigation and File Management

6. Remove Files and Directories:

- 6.1. Delete unnecessary files and directories:

```
Example for Windows command prompt:

del docs\documentation.txt
rmdir /s /q images

Example for Linux Unix and Mac terminals:

rm docs/documentation.txt
rm -r images
```

7. Navigate Back to Parent Directory:

- 7.1. Use cd .. to move back to the parent directory:

```
cd ..
```

8. View Current Directory Path:

- 8.1. Confirm your current directory path using cd (Windows) or pwd (Linux):

```
Example Windows:
cd

Example Linux:
pwd
```

9. Clean Up

- 9.1. Remove the project directory (optional):
